

Resource Library

Project Outline

The Resource Library gathers support resources for disabled scientists into a single location, on the Enable Science website. Available support will be summarised and accompanied by additional guidance and shared experiences. This will empower individuals, and businesses and schools seeking to support individuals, to search through support options and make informed choices to address any current barriers.

In Partnership with J Media

J Media - Website Design, SEO, and Marketing. Putting your vision in the right places, with your customer in mind.

With Funding from the Royal Society of Chemistry.

Inclusion and Diversity Fund Award #171561453 was granted to develop the Enable Science website, including the online Resource Library, as part of the 2021 application to establish the Enable Science: Disabled Scientist Network.

Resource Library

Problem Statement

Access to support is hindered by a lack of awareness of the support available, reliance on medical diagnoses, and the often complicated and challenging application processes involved.

Through our Resource Library, we are seeking to collate and simplify resources available to disabled scientists to allow individuals to feel confident in identifying and accessing suitable support.

Success Criteria

Project success will be monitored through:

1. The number of visits to the Resource Library on the Enable Science website.
2. Engagements with posts sharing the resources across social media.
3. Contributions, comments, and suggestions, relating to the Resource Library, through the contact form on the Enable Science website.

Get Involved

As a small, voluntary team at Enable Science, we welcome your support to develop our Resource Library. In addition to increasing the speed with which we can publish resources for the Enable Science community, you can help to make the shared resources as relevant and beneficial as possible,

We actively encourage your contributions, comments, and suggestions for our Resource Library. These can be shared through the contact form on our website.
